

ZAMEER HAIDER

Senior Flutter Developer

Lahore, Pakistan | +92 345 520-0921 | zamirhaider23@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Senior Flutter Developer with over 5 years of experience building and shipping production-grade cross-platform mobile applications on iOS and Android. Proficient in Flutter/Dart with deep expertise in Firebase, RESTful and GraphQL API integration, and state management using BLoC, GetX, and Provider. Experienced in architecting scalable apps using MVC and MVVM patterns, integrating third-party SDKs and payment gateways, and delivering complex features end to end. Applies a governance-driven, phase-based SDLC with contract-first delivery, Definition of Done gates, and audit-ready state tracking. Proficient in AI-assisted development using Cursor, GitHub Copilot, and Google Antigravity — leveraging agentic workflows to accelerate feature delivery. Comfortable working independently in remote environments and collaborating across distributed teams.

PROFESSIONAL EXPERIENCE

Senior Flutter Developer, [Ignite](#) – Lahore, Pakistan

May 2024 – Present

OneBiz — Multi-Vendor Merchant Platform · [App Store](#)

- Built end-to-end multi-vendor commerce platform enabling merchants to manage sales, bookings, products, and services across iOS and Android
- Integrated Firebase for real-time data sync and push notifications; implemented secure authentication including social logins
- Architected RESTful API communication using MVC pattern with GetX state management for a maintainable, scalable codebase
- Integrated multiple payment gateways including Tabby, Tamara, and Nearpay
- Delivered complex feature modules: geolocation, QR scanning, PDF generation, analytics dashboards, and offline storage via Hive
- Engineered and shipped AI chatbot with block-based response model, intent routing, confirmation lifecycle, and idempotency-safe message delivery — integrated via consumer alias endpoints with strict app/role header contracts and tenant-isolation gates

ONE App — All-in-One Lifestyle Platform · [App Store](#)

- Developed lifestyle super-app connecting users with local businesses across shopping, food delivery, service appointments, and ticketing
- Designed and implemented full app architecture in Flutter/Dart with Firebase authentication, real-time updates, and push notifications
- Integrated multiple secure payment gateways for seamless in-app transactions
- Applied MVC pattern with GetX; optimized for both iOS and Android deployment
- Shipped AI chatbot integration with contract-first delivery: typed block consumption, confirmation token handling, and X-App-Client/X-User-Role header enforcement aligned to backend API parity matrix

Flutter Developer, [Ignite](#) – Lahore, Pakistan

Aug 2021 – May 2024

Ignite — Cross-Platform Business Management Platform · [App Store](#)

- Built cross-platform business management app for operations, customer connections, and growth on iOS and Android
- Integrated Firebase backend, OneSignal push notifications, and SurePay/NearPay payment gateways
- Implemented MVVM architecture with Provider state management for a clean, testable codebase

Flutter Developer, [The Xpertz](#) – Lahore, Pakistan

Aug 2020 – Aug 2021

Doyen — Live Audio Streaming App

- Built cross-platform live audio streaming app (Clubhouse-style) using Flutter/Dart and Agora SDK
- Integrated Firebase backend, social login, and Provider state management for real-time voice communication

Intern / Junior Flutter Developer, [The Xpertz](#) – Lahore, Pakistan

May 2020 – Jul 2020

- Built responsive UIs from scratch and converted PSD designs into functional Flutter interfaces
- Implemented networking fundamentals and state management during hands-on internship

OTHER PROJECTS

GrapevineGO

- Built customized treasure hunt app where users locate hidden locations, answer questions, and compete against teams — featuring organizer-defined themed hunts and interactive challenges

grapevineQUEST

- Developed smartphone-based photo scavenger hunt app enabling participants to engage in location-based challenges through mobile photography

EDS App

- Built employee management system for managing staff data, attendance, payroll, and HR operations in a Flutter mobile application

FSC Room Scanner

- Developed Flutter-based cleaning record management system for hotel staff to track, manage, and maintain room cleaning operations

Cyber Private App

- Built cybersecurity awareness portal enabling users to check whether their email credentials or passwords have been compromised in a data breach

PMS — Project Management System

- Developed Flutter-based bug and issue tracking system (Jira-style) enabling teams to manage tasks, collaborate, and streamline workflows

EDUCATION

Bachelor of Software Engineering

Sep 2013 – Nov 2017

Superior University, Lahore, Pakistan

SKILLS

Mobile Development: Flutter · Dart · iOS · Android · Responsive UI Design · Material Design · Cupertino Guidelines · Deep Linking · Localization

State Management: BLoC · GetX · Provider · Riverpod

Architecture & Engineering: MVC · MVVM · Clean Architecture · RESTful APIs · GraphQL APIs · Phase-Driven SDLC · Contract-First Delivery · Tenant Isolation · API Parity

Backend & Cloud: Firebase · Firestore · Amplify Flutter · Push Notifications (FCM · OneSignal · Amplify)

Payments & SDKs: Tabby · Tamara · Nearpay · SurePay · Agora SDK · Third-Party SDK Integration

AI & Developer Tools: Cursor · GitHub Copilot · Google Antigravity · Agentic Workflows

DevOps & Tooling: Git · Xcode · Android Studio · Visual Studio Code · App Deployment (App Store · Play Store)

Soft Skills: Leadership · Problem-Solving · Team Collaboration · Communication · Time Management · Adaptability
